

GRX1 GNSS Receiver

“This new GNSS system provides unmatched versatility and usability in RTK, network RTK and static applications that require millimeter or centimeter positioning accuracy”

- Jan van der Weijden, Sokkia BV Managing Director

- ✓ Fully upgradeable, dual-frequency 72-channel GPS+GLONASS receiver.
- ✓ Built-in digital UHF radio and GSM module allow all types of data communication for RTK correction, both at a base station and at a rover side.
- ✓ Long-range Class 1 Bluetooth specification allows wireless control from a distance, providing ideal solution when receiver/antenna is raised above trees, fences or other blockage.
- ✓ Voice messages notify the users when RTK is fixed or lost, or other problems occur, eliminating a need for repeated checks with controller’s display.
- ✓ Data storage in SD (SDHC) memory cards.

SHC2500 is a Rugged, Alphanumeric Handheld Controller equipped with a 5.17 MP Camera and built-in 2GB of RAM

Take advantage of a data collector with a highly advanced 5.17 MP camera. Don’t worry about the amount of images being taken since you can simply offload the images with a USB flash drive.

Leica ScanStation C10 The All-in-One Laser Scanner for Any Application

The “All-in-One” ScanStation C10 delivers a faster payback for your investment in High-Definition Surveying™ (HDS™)

Leica’s new All-in-One Scanner has opened the door for more opportunities to expand on an already increasing market place for High-Definition Surveying™ services!

The industry’s most popular class of laser scanner - ScanStation - is now in a compact, all-in-one ScanStation C10 platform: scanner, battery, controller, data storage, and video camera. In addition, ScanStation C10 also features major advances in productivity, versatility, and ease-of-use for as-built and topographic HDS™ projects.
